

INTRODUCING the **Certified Health Value Professional Designation**

validationinstitute

THE VALIDATION INSTITUTE enables transparent and improved health outcomes and costs for necessary care through the Certified Health Value Professional (CHVP) designation. This professional training program will equip organizational healthcare purchasers and advisors with the tools and knowledge required to find and monitor vendors that provide the greatest value and service to your employees.

Five Reasons to Obtain Your Certified Health Value Professional Designation

- 1.** Identify and monitor high-value, high-impact programs and share best practices.
- 2.** Be confident vendor performance reports and claims are accurate.
- 3.** Determine whether a healthcare benefit program can improve quality without increasing costs.
- 4.** Deliver effective programs your employees will value and appreciate.
- 5.** Facilitate better health outcomes for your employees and significant savings for your company.

What is a CHVP?

The **Certified Health Value Professional (CHVP) program** is a self-paced program designed to establish a knowledge base on key topics relating to health care outcomes and costs. Courses are created and presented by leading industry subject matter experts. The program is available in-person or online. CHVP candidates typically are advisors or responsible for purchasing health care benefits. They may work in the financial, benefits, or human resources areas of the corporation and may include the CFO, Controller, Benefits Executive, HR Director, or HR Manager.

What You Will Learn

The CHVP program currently covers twelve health-benefits-related training modules. Certification requires candidates to pass a minimum of ten modules that take an average of 90 minutes each to complete including the final quiz. *The training modules include:*

1. Establishing Worksite Primary Care and Steerage Arrangements
2. Identifying and Monitoring High Performance Health Care Services
3. Utilizing Effective Population Health Management Techniques
4. Developing Health Care Direct Contracting
5. Optimizing Drug Spend
6. Managing Reference-Based Pricing
7. Managing Bundled Pricing
8. Managing Captive Insurance Arrangements
9. Finding And Monitoring The Right Stop Loss Coverage
10. Utilizing Effective Health Benefits Analytics
11. Maximize Performance & Managing Risk with Self-funded Health Plans
12. Bulletproofing Your Summary Plan Design and Documentation
13. Using Claims Review To Capture Immediate Savings
14. CORA*

* Our CORA program can be purchased separately.
