Drew is co-founder and CEO at Validic, the leading digital health platform for personal health data. He is the Board Chair of the Consumer Technology Association (CTA) Health Division and a member of the CTA Executive Board. Drew also contributes to advancing the industry through CTA policy efforts and my involvement with the CTA Health Standards Subdivision. Drew also serves on the Executive Committee and Board for the North Carolina Council for Entrepreneurial Development (CED). He served as a Board Member for Executives for Health Innovation (eHI) and as a Team Member for the Clinical Trials Transformation Institute (CTTI) project Advancing the Use of Mobile Technologies for Data Capture & Improved Clinical Trials. I previously served on the Federal Advisory Committee joint HITPC/HITSC API Task Force on Meaningful Use 3

Before co-founding Validic, Drew started and managed an award-winning web development firm for eight years. He also founded and exited a niche dietary nutrition website for patients with celiac disease and served as an Adjunct Instructor at the University of Iowa, teaching graduate courses in web development and usability.

Drew lives in Chapel Hill, NC with his wife and two sons. He enjoys design, technology, good beer, great food, and coffee.
