Validation Achieved: Savings and Contractual Integrity

Valid through: February 2026

Company Profile

Category:	Disease Management
Website:	https://archehealthcare.com
Public or Private:	Private
Year Established:	2017
CEO:	Scott Kantro
Company contact:	866-601-5221

Description Provided by the Company:

Arche Healthcare is the leading population health management (PHM) provider for diabetic foot health. Our state-of-the art, patient-centered diagnostic and engagement tools, combined with a standardized risk stratification process, allow for timely interventions that reduce diabetes-related lower extremity wounds and amputations by up to 50%.

Arche Healthcare's PHM strategy, together with its programs and tools, are trusted by leading clinicians and informed by the latest evidence-based research on diabetic foot health and validated by the Care Innovations™ Validation Institute. As the creator of the Comprehensive Diabetic Foot Exam (CDFE), we partner with forward-thinking health plans, national health retailers, retail pharmacy, healthcare providers, skilled nursing facilities, and other healthcare organizations across the country to address a costly and debilitating healthcare event.

Validation Report

Arche Healthcare is a medical device and healthcare service company addressing diabetic foot care, and the \$60 billion cost of diabetes-related wounds and amputations. In an increasingly outcomes driven healthcare environment, Arche's proprietary IT platforms offer healthcare providers, health plans and other healthcare stakeholders, seamless and compliant healthcare delivery tools to help prevent the 1st wound.

The model, informed by the latest evidenced-based research on diabetic foot health, demonstrates the results of a comprehensive Lower Extremity Amputation Prevention (LEAP) initiative and the clinical and economic impact that early risk identification and stratification can have on a diabetes population.

As is the case with "financial spreadsheet validation" according to the rules of the Validation Institute, users may change assumptions in order to model different impacts on prospective results.

Validation and Credibility Guarantee

Arche Healthcare's **Comprehensive Diabetic Foot Exam (CDFE)** achieved validation for **Savings and Contractual Integrity**. Validation Institute is willing to provide up to a \$50,000 guarantee as part of their Credibility Guarantee Program. To learn more, visit <https://validationinstitute.com/credibility-guarantee/>

Program Validation

Program has strong evidence of significant impact on both patient outcomes and on medical costs. Evidence is assessed based upon the certainty it provides that the result is due to the program and not to other factors, such as recruiting people to participate in the program who are most likely to succeed.

Savings

Can reduce health care spending per case/participant or for the plan/purchaser overall.

Outcomes

Product/solution has measurably improved an outcome (risk, hba1c, events, employee retention, etc.) of importance.

Contractual Integrity

Model contract meets Validation Institute standards for transparency.

Validation Expiration: February 2026

CERTIFICATE OF VALIDATION

Applicant:

Arche Healthcare

24 East Ave, #273

New Canaan, CT 06840

Product:

Comprehensive Diabetic Foot Exam (CDFE)

Claim:

Proprietary IT platforms + CDFE offer healthcare providers, health plans and other healthcare stakeholders, seamless and compliant healthcare delivery tools to help prevent the 1st wound, which saves money

Validation Achieved:

Validated for Savings and Contractual Integrity

About Validation Institute

Validation Institute is a professional community that advocates for organizations and approaches that deliver better health value - stronger health outcomes at lower cost. We connect, train, and certify health care purchasers, and we validate and connect providers delivering superior results. Founded in 2014, the mission of the organization has consistently been to help provide transparency to buyers of health care.

Validation Review Process

Validation Institute has a team of epidemiologists and statisticians who review each program. The team focuses on three components:

- Evidence from published literature that a similar intervention had similar results.
- The reliability and credibility of the data sources.
- The rigor of the approach to calculating results.

To achieve validation, the program has to satisfy each of these components. VI's team then summarizes the review into a report which is publicly available. Details of VI's review are available with the program's permission.
