# Leading the Change in Healthcare

Employer Direct Healthcare is a market-leading healthcare services business providing high-quality and cost-efficient solutions for self-funded employers and their members. We are on a mission to transform access to excellent care for the moments that matter most. Our solutions transform healthcare for our members, facilitating access to top-quality care at fair prices nationwide.

For more than a decade, our team has helped organizations better care for their people with access to the best providers in the nation because we believe that there should not be a trade between affordable care and excellent care. At Employer Direct Healthcare, employees have the opportunity to grow and influence change from within.

Employer Direct Healthcare's first offering, SurgeryPlus<sup>®</sup>, is the market-leading surgical benefit, providing full-service guided access and network services to millions of covered members across hundreds of employers. In 2023, we launched a first of its kind, comprehensive end-to-end oncology solution, Cancer Care Direct - for the employer market.
