Description Provided by the Company:

US-RX Care delivers Pharmacy Benefit Risk Management unlike any other service offered by pharmacy benefit managers (PBMs) of any kind, anywhere in the US.

US-RX Care provide fiduciary pharmacy risk management to self-insured employers with a singular focus on balancing cost and quality care in the best interest of plan sponsors and their plan participants.

US-RX Care is obsessed with service and quality of care - with no financial conflict of interest, no hidden profits and unrestricted transparency.

Claim Assertion for Validation

US Rx's model contract meets Validation Institute standards for transparency. These standards include definitions of terms, client access to data, and guarantees.

Method / Calculation / Examples

US Rx's contract was reviewed by a PhD with expertise in health care fraud detection and pharmacy benefit management contracts. The reviewer compared US Rx's model contract to the Validation Institute standards for transparency. US Rx responded to comments on each standard and where needed, revised the contract.

Findings & Validation

US Rx's model contract submitted to Validation Institute in August 2022 meets the standards for transparency

Limitations

US Rx's contract includes services provided by a rebate aggregator, whose revenues are beyond the scope of the client contract.

Validation Expiration: July 2025

About Validation Institute

Validation Institute is a professional community that advocates for organizations and approaches that deliver better health value - stronger health outcomes at lower cost. We connect, train, and certify health care purchasers, and we validate and connect providers delivering superior results. Founded in 2014, the mission of the organization has consistently been to help provide transparency to buyers of health care.

Validation Review Process

Validation Institute has a team of epidemiologists and statisticians who review each program. The team focuses on three components:

- Evidence from published literature that a similar intervention had similar results.
- The reliability and credibility of the data sources.
- The rigor of the approach to calculating results.

To achieve validation, the program has to satisfy each of these components. VI's team then summarizes the review into a report which is publicly available. Details of VI's review are available with the program's permission.
