

Non-Optimized Medication Use is Impacting Healthcare Costs

Healthcare costs are on the rise largely due to chronic conditions. Medications are the primary method used to treat chronic conditions, but research shows that 50 percent of patients do not take their medication as prescribed. Additionally, 16 percent of U.S. health care spend is related to non-optimized medication use. Chronic condition management is an effective and proven solution that uncovers the “why” behind non-adherence and non-optimized drug use; preventing unnecessary health care claims from occurring.

TRIA HEALTH OPTIMIZES MEDICATION USE

Tria Health was founded on the belief that pharmacists play a vital role in the care management of high-risk patients that drive the majority of health care spend. Given that medications are the primary treatment method of chronic conditions, including specialty, Tria's chronic condition management services help employers reduce their risk and control cost through patient-centered care. As part of their care team, Tria's pharmacists work one-on-one with patients and their physician(s) to improve the patient's health.

Tria Health's complete patient care services consist of: chronic condition management - including diabetes monitoring, pharmacy optimization, weight management and tobacco cessation.

POWERED BY PHARMACISTS SUPPORTED BY DATA & TECHNOLOGY

EXPERT RESOURCES

Tria Health's pharmacists are not only experts in medication management, but they are also certified diabetes educators and carry various board certifications. Additionally, Tria Health employs dietitians that provide additional support for patients managing obesity.

REMOTE MONITORING

Tria Health is device agnostic. However, we can provide cellular glucometers with connectivity to our mobile app. Members can easily monitor their diabetes and communicate with Tria Health. Getting personalized care has never been so easy!

MEASURABLE OUTCOMES

Tria Health provides quantifiable reporting on member engagement, health care improvements, pharmacy savings and healthcare trends. Tria Health delivers an average annual return on investment of 3.6 to 1.

VALIDATED SAVINGS

A third-party analysis conducted by Health Care Data Partners and validated by the Validation Institute has shown that engagement in Tria Health reduces healthcare costs over time for two every expensive healthcare channels. This study analyzed the cost and utilization associated with poor outcomes related to the mismanagement of hypertension, hyperlipidemia, diabetes and heart disease.

59% REDUCTION WITH IN-PATIENT HOSPITAL VISITS

56% REDUCTION IN EMERGENCY ROOM COST

PHARMACY ADVOCATE PROGRAM

Innovative Chronic Care Management (CCM)

The Pharmacy Advocate Program provides personalized, pharmacist-led patient consultations for high-cost, complex plan members (with chronic + specialty disease states). Tria's clinically trained pharmacists work one-on-one with plan members to ensure medications are safe, affordable and effective, while providing condition management education and coordinating care with physicians.

Targeted Conditions

- Asthma/COPD
- Heart Disease
- High Cholesterol
- Migraines
- Pain
- Diabetes
- High Blood Pressure
- Mental Health
- Osteoporosis
- Specialty

RxPLAN PROTECTION SUITE

Improve & Manage Total Population

The RxPlan Protection Suite safeguards employers' investment in pharmacy through targeted outreach, focusing on improving care, reducing waste and controlling cost. Not only do plans benefit, but patients are able to save money as well! Patient outreach and care coordination include more avoidable drug switches, discontinuation of duplicate or unnecessary medications, medication non-adherence alerts and notifications of gaps in care.

OPTIONAL - CHOOSE TO LOSE

Tria Health's Choose to Lose program is a comprehensive weight loss solution that provides participants with a dedicated dietitian and access to the industry-leading health and fitness app, Lose It!. Members will also be given the option to discuss weight loss medications to help kick-start their weight loss journey with a Tria Health pharmacist.

A Targeted or Total Population Solution

Choose to Lose can be offered to members with a BMI > 30, between 27-29 with a co-morbidity. Tria Health can also target engaged members in the Pharmacy Advocate Program with diabetes or pre-diabetes.

TRIA HEALTH'S MOBILE APP

Tria Health's mobile app empowers patients to take control of their health. From medication reminders to mobile care plan access, Tria Health's mobile app provides patients with the tools they need to keep their health moving in the right direction. Additionally, patients can easily communicate with their Tria Health care team directly through the live chat feature.
