

Tailored Solutions For Maximum Results

A Case Study

Challenge

Recently, a national arts and crafts retail company faced significant challenges for its members. With stores in 47 states, its **employee base was decentralized, mostly part-time**, and the population had an **identified prevalence of chronic kidney disease (CKD) risk**.

The company urgently needed a solution that would help them contain costs and improve member health.

Some members had progressed to **end-stage renal disease (ESRD)**, resulting in **high dialysis claims**.

Solutions

impactCare

impactProtect

The client turned to **ImpactProtect**, Renalogic's proven dialysis cost containment solution, to deliver **immediate results to protect plan assets**.

The client turned to **ImpactCare**, which significantly **delays the progression of chronic kidney disease**, while also **reducing the subsequent health plan costs**. Renalogic's clinical team immediately assessed the situation and engaged with employees using high-touch outreach.

Results

In the first year of implementation alone, **ImpactProtect** and **ImpactCare** significantly **decreased dialysis claims** and provided members with the right care at the right time to **prevent future risks and costs**.
