

Dr. Timothy Shiu is the Chief Health Information Officer and Vice President for Digital Clinical Transformation for ChristianaCare in Delaware. In his role, he leads the development and implementation of a comprehensive enterprise digital health and clinical information strategy that facilitates effective, value-based, "high-tech / high-touch" health care delivery across the continuum. He promotes digitally-led clinical transformation through the use of health information technology, strategic partnerships and collaboration with system leaders.

Dr. Shiu is board certified in Clinical Informatics and Emergency Medicine and continues clinical practice and education as Assistant Clinical Professor at the Sidney Kimmel Medical College of the Thomas Jefferson University. He also serves as a Medical Officer for MD-1 DMAT under the federal National Disaster Medical System and Department of Health and Human Services. Dr. Shiu completed a combined BA/MD program and residency training at the University of Rochester - Strong Memorial Hospital and is a 2018 graduate of the Master's in Health Care Delivery Science program at Dartmouth College.
