

Owen Scott Muir, MD, is a dual-board certified Child and Adult Psychiatrist who focuses on health benefits as a driving force behind better mental health. He is an official Mentalizing Treatment Supervisor through the Anna Freud Centre in London, an NIMH-funded researcher on using AI to guide psychiatric treatment. His publications include *Adolescent Suicide and Self Injury: Mentalizing Theory and Treatment*, by Springer Nature in 2020, and 200+ peer-reviewed publications and keynote presentations across various settings.

He has presented keynotes at Spotify's Post-Pandemic Homecoming, the American Academy of Emergency Psychiatry, the International Conference on Emergency Medicine, AACAP, APA, NUBE, CTMSS, NASSPD, and other letter-soup academic conferences. He was a visiting lecturer teaching architecture students at Pratt School of Design, trained medical science liaisons at Key Opinion Leader Summits, and a daily health [newsletter--  
TheFrontierPsychiatrists.substack.com](#)

He is a multiple-time founder and currently is SVP of Strategy for Acacia Mental Health, bringing advanced fMRI-guided brain stimulation treatments to market for depression, PTSD, OCD, and other neuropsychiatric conditions. He has been a principal investigator in psychedelic medicine and artificial intelligence clinical trials and is an international expert in neuromodulation with transcranial magnetic stimulation.

His personal experience as a patient receiving psychiatric care makes his message compelling. He is a physician who works with people who have lost all hope. This comes with seriously humbling experiences. Even with all this, Dr. Muir is a relatable human. He wears Converse every day. A deep dive into his past will reveal his prior life as a recording engineer and musician, with over 40 albums to his credit and several full-length records as a bandleader.
